

Mya

Mya

- Mya is a 32 yo Chilean trans-feminine person who uses she/her/hers pronouns.
- She was born in Chile and immigrated with her family to the US at age 4.
- At home, Mya's feminine expressions were supported by her mother and grandmother, but at school she was often bullied by other boys and found protection through her female friendships.

Mya

- In her late teens, Mya identified as a femme gay man.
- In her early sexual relationships, she took the passive role, and in sexual fantasy, she would often imagine herself to be a woman.
- Historically and currently, is sexually active with natal males.

Mya

- In her early 20s, Mya was introduced to other trans feminine individuals. She began to cross-dress and present herself as “Mya”.

Mya

- She began hormone treatment with sublingual estradiol and spironolactone 1 ½ years ago.
- Her last testosterone level was 179
- Estradiol level was 105
- For the most part, she is quite pleased with her feminization. She is considering breast augmentation and asks you about getting a letter for surgery

Mya

- Despite transitioning towards greater feminization, she still experiences sexual pleasure from the use of her genitals
- She tells you that she is having difficulty getting and maintaining erections
- She asked you if there is something that could be done that would help her maintain erections as this has become a source of frustration for her and her partner. Mya is worried that her partner might not want to remain in a relationship with her if she doesn't have “working equipment”.
